GO SOLAR

Simple Solar makes it easy. Get a fast, fixed quote, without the pushy sales.

Your new solar energy system can be up and running in just 2-3 weeks. Turn daylight into electricity, and start saving straight away.

SUNPOWER
Premier Partner

**IS
SOLAR
RIGHT
FOR
YOU?**

A young girl with her hair in a bun, wearing a light blue shirt and a yellow dress, is seen from behind, standing in a field of tall green grass and yellow wildflowers. She is reaching out with her right hand towards the horizon. In the background, there are rolling green hills under a bright, slightly overcast sky. The corner of a dark wooden building is visible on the left side of the frame.

For many homeowners and businesses, getting solar installed just makes sense.

Solar panels generate free electricity from daylight. That means buying less energy from the grid, and cutting your bills.

And if you add a battery, you can store spare energy to use in the evening. You can earn cash on the electricity you don't use by selling it back to the grid.

Once your system is installed, you'll start cutting your energy bills right away with free, clean energy. It could be one of the best investments you make.
